

Skin Cancer and Sun Awareness Day

Tuesday 18 June 2019

Walsall Manor Hospital

(Route 107)

8am – 2.30pm

Most people have some moles on the skin which remain harmless all their lives, however any rapidly growing or changing moles should be shown to a healthcare professional.

If you have any concerns, the dermatology unit will be able to check suspicious lesions and share important information on skin care and protection against the sun. Please note this is for mole checks ONLY - not rashes, warts, etc.

This is an 'Open Day'

You do not need to book an appointment for this event!

If you have queries, please contact the Dermatology Secretaries on 01922 721172 ext 7585 or 01922 656336.
